

THE PHILOSOPHY OF MURDER

Mick, a young tradie, accidentally kills a client during an argument.

Unable to deal with his actions, Mick seeks out his brother Shane, an outlaw biker and amateur philosopher, who enlists Kev, a friend and local drug dealer, to remove some incriminating evidence from the scene. When Kev realises he is now implicated in a murder, he freaks out. Shane assaults him and ties him up, discussing the philosophical reasons for why Kev should be their scapegoat. Needing to cover up one killing and on the verge of committing another, Mick and Shane work their way towards freedom, experiencing many complications and coming to learn much about themselves – and each other.
